

BigPicture Trello - Colour by label

Colour by Label

Another useful option in the 'View' tab, which allows users to apply Trello's native colours to tasks on the Gantt chart depending on the colours of Cards' labels. When the option is switched 'OFF' Task Bar becomes greyish plank. When it is 'ON' and we decided to pick a custom colour for it from our Label settings, then the custom colour of our choice will be displayed on the little stripe to the left of the Task on Gantt's WBS.
