New Gantt - Show - Time boxes

Displaying Time-boxes

The time boxes highlight the Iteration or Program Increments, as defined using the Hierarchy and Timeline view modes of the Overview module.

You can only show sequential time boxes which means that they can not overlap.

The colours of the boxes indicate the status:

- not started - grey
- in progress - blue
- closed - green

When planning your task in different Time boxes the app can update your tasks' dates to fit within the boxes period - Program Box Configuration - Tasks - Scheduling.
Non agile team can also benefit from all the Board's features. Simply rename your Program Increments and Iteration to years, quarters or months and start your short or long term planning using the Board.

Go back to the New Gantt - Interface overview.
