Impressions

This section is dedicated to longer insights aimed at detailing the author's first impressions of a given plugin through its trial period. It's a written down journey of an average Project Manager looking for the best Gantt charts tool for his JIRA instance. These are short, at times humoristic overviews based on a particular JIRA instance and versions of the plugins. They should be treated as case studies, not full reviews. For fully up-to-date and weighted comparisons, please refer to this section: Gantt chart comparison
