Defining the working time

The workload plans are the basis for the resource capacity i.e. they determine the users daily, weekly and monthly capacity which is calculated by the Resources and Board modules.

The working time is defined using the Workload plans to which the Resources can be assigned using the Resource Manager.

The work time can be set starting from 0 which means a non working day up to 24h with 5 minutes granulation. Using drag and drop you can adjust the working period.
