Task Bar

Each Task on our Gantt chart is displayed in the form of a Task Bar. It can have a few forms (either a bar or a double-sided hook when it comes to Parent Tasks). Regular Task may have the colour of our choice picked from the Task Context Menu, a colour of its label (if we select this option) or be a greyish plank.

The parent task is always grey so the colour of the bar can not be changed. Tasks have circles on both sides which can be grabbed to create dependencies with other Tasks. It has a Label which is a Card's Title.

When 'Smart Labeling' is used and Task's Label cannot fully fit into the Task Bar, it will be displayed on the side to the right of it.
