The infobar

This sidebar provides useful information about crucial project data.

Milestones

Project milestones can be tracked using the Inforbar (sidebar). You can also navigate to the selected milestone by clicking on the ‘target’ icon next to the milestone.
Overdue tasks

Show all work items which are running late. Simplest definition of an overdue task is: finish date is earlier than today and status is other than closed.

Overdue tasks are displayed as a list on the Infobar (sidebar) and are indicated with red or yellow colour.

Dependencies

Due to technical limitations, not all tasks in the scope are displayed in the list. Only the tasks kept in the temporary cache memory are listed here. The delayed tasks are calculated in relation to today's date.
