Manual Work Breakdown Structure

The structure can be created manually using the arrows found on the module’s header, drag and drop or using keyboard shortcuts: Shift + Arrow key.

WBS validation

When the synchronizers are enabled some conflicting operation will be blocked.

In such case, the app reverts the manual change and a validation message is displayed:

![Validation Message]

We couldn't change this task position due to activated synchronizers.

Click here to learn more about it.

Learn more about the validation rules and creating the WBS automatically using structure builders.
