

Board - View - Totals

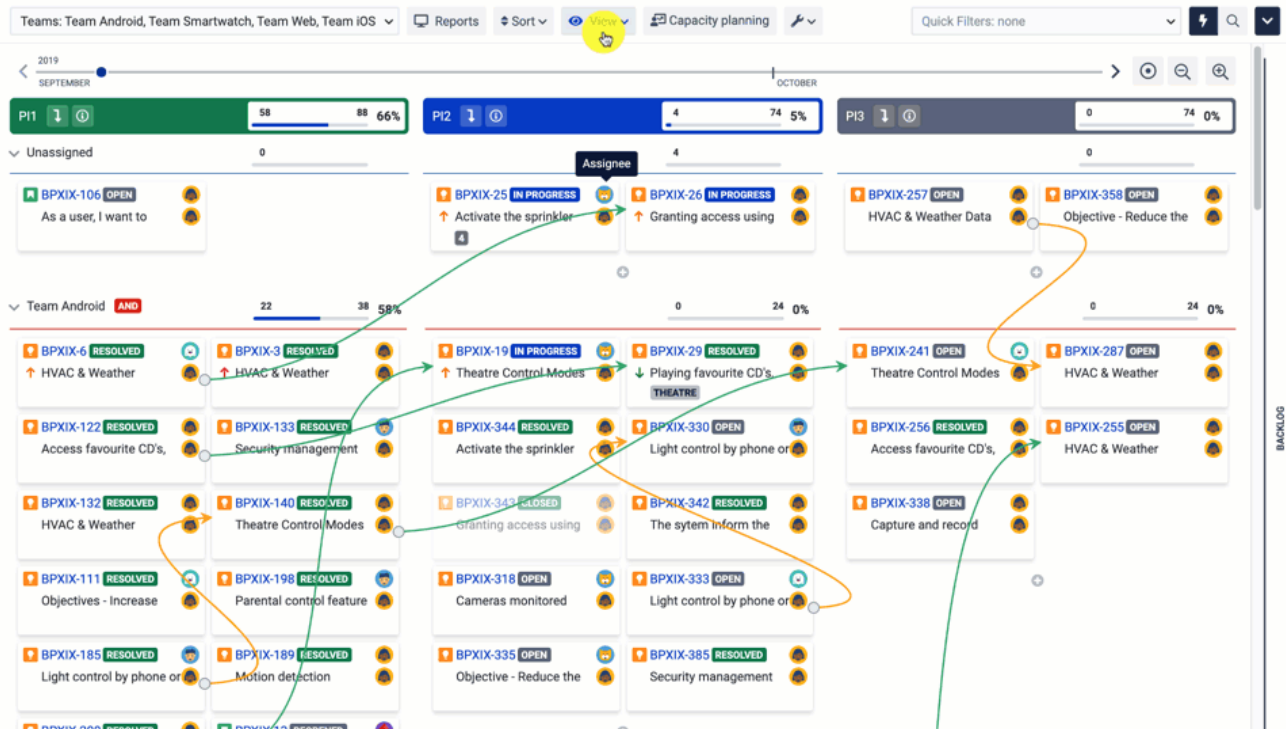

Working with Totals

Totals will help you in, both, planning and monitoring the execution of your Time-boxes.

There are different indicators or aggregations which can be displayed for each of the Time-boxes as well as at the Team level:

Once enabled, Totals boxes will be displayed only if data is available in a particular box (Tasks assigned with estimates)

'Totals' indicators displayed at Team and unassigned level will include data relevant to a selected team or Team unassigned row.

Totals type	Aggregate by	Formula	Screenshot
Work progress	Story Points (SPs)	Sum SPs of Done status category tasks / Sum SPs of all tasks in Box scope	

	Tasks	Count "Done" status category tasks / Count all tasks in Box scope	
	Time spent (TS)	Sum Time Spent of all tasks in Box scope / Sum (Time Spent + Remaining Estimate) of all tasks in Box scope	
Capacity allocation	Original estimate	Sum OE of all tasks / Box capacity in SPs	
	Remaining estimate (RE)	Sum RE of all tasks/ Total Box capacity	
	Story points	Sum SPs of all tasks / Box capacity in SPs	

Overallocation warnings

If the allocation exceed the capacity a warning will be displayed and progress bar will indicate the overallocation using a red colour.
