

Differences between BigPicture Enterprise and BigPicture

BigPicture Enterprise works as an add-on for [BigPicture](#), adding to it many new features aimed at solving specific problems typically faced by large organizations. Do more than you have ever done before!

 BigPicture Enterprise is now available to Jira Cloud users!

Work without limits

Addressing the needs of large-scale organizations (including the ones with distributed workforce), the Enterprise extension serves to augment and amplify [BigPicture](#) features to provide unmatched control and value. It enhances the way projects and portfolios are managed by delivering the following high-level PPM features:

- Program Increment level reporting in 'Board' and 'Roadmap' modules,
- [Configurable menu view](#),
- [Cross-program resources planning and reporting](#),
- [Defining custom link-based actions](#),
- [Integration with Tempo apps](#),
- Synchronization of [Program Increment with a given custom field](#),
- Advanced, [fully-customizable reporting with 'Reports' module](#),

 Tempo integration is currently available to Jira server users only.

 PLEASE NOTE: BIGPICTURE ENTERPRISE IS NOT A STAND-ALONE APP AND REQUIRES AN ACTIVE INSTANCE OF [BIGPICTURE](#) (LICENSED SEPARATELY)!
