## Customising the view

Each column can be further configured and there are two options:

- data aggregation
- display

New Time tracing formula is now available:  $\text{Time spent} / (\text{Time spent} + \text{Remaining estimate}) * 100\%$ .

The available aggregation and display options will vary depending on the type of field added as a column.

Feature	Description
Columns preview	Preview your column setup.
Column configuration - Display	<p>Select how to display the available data. Most common options include:</p> <ul style="list-style-type: none"> <li>• Text</li> <li>• Lozenge</li> <li>• Date</li> <li>• Date with time</li> </ul> <p>Fields such as Time Tracking have additional options:</p> <ul style="list-style-type: none"> <li>• Progress</li> <li>• Progress with %</li> <li>• Reported/expected progress</li> <li>• Reported/expected progress %</li> </ul>

Column configuration -Aggregation	<p>Select how the data will be aggregated on the parent level of WBS:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Minimum</li> <li>• Maximum</li> <li>• Sum</li> <li>• Sum without parent</li> <li>• Average</li> <li>• Average without parent</li> <li>• Children by status category (Sum without parent aggregation is used)</li> <li>• Children by status category % (Sum without parent aggregation is used)</li> </ul>
Tree root	Select the field next to which the WBS tree (task hierarchy) will be displayed.
Remove column	Remove the field column from the task list.
Field name	List of available fields which can be added as a column to the Gantt task list.
Field type	Type of available fields - depending on the type, different display and aggregation options will be available.
Add field	Add a field as a column.
Column configuration	Select the display and aggregation settings.
Field search box	Search the list of available fields.
