## Program Teams

Teams can be created also at the Program level. The main differences are:

- such Teams can not be converted to Global Teams,
- synchronization of Program Teams with Tempo apps is not possible.

The concept of teams is used mainly in the Resources, Roadmap and Board modules but as the information about the team is stored as a [label](#) or a [custom field](#), it can be also displayed using Gantt, Scope or Risks module.

Feature	Description
Create new team	There are three options available: <ul style="list-style-type: none"> <li>• Create new team</li> <li>• Copy global team (such team can be edited once added to a Program)</li> <li>• Assign global team (such team can not be edited once added to a Program)</li> </ul>
Team name	Team name is used to identify teams by app's modules.
Team code	Team code is used to identify teams and depending on the configuration is stored as: <ul style="list-style-type: none"> <li>• Labels</li> <li>• Single select type of field</li> </ul>
Team board link	Link the team to its Board in Jira to quickly switch between different views. <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p> This link is required to <a href="#">auto-configure the Board</a> module using 'Team specific' mode.</p> </div>
Expand team	Team consists of team members, when expanded a list of members will be displayed.
User details	Link to Jira user management section.
Add team button	Confirm adding a new team when all the team details were entered correctly.
Membership period	Your resources can be shared across different teams in the same period of time or can be fully allocated to a single team. This issue can be addressed using the the memberships and availability of the team members.

Availability	<p>Calculation of an individual resource's capacity takes into account the availability of the member across all Teams.</p> <div data-bbox="277 184 1482 268" style="border: 1px solid #ccc; padding: 5px; margin-bottom: 5px;"> <p> The availability impacts the capacity resulting from the Workload plans and currently there is no validation which means that the total availability may exceed 100%.</p> </div> <div data-bbox="277 296 1482 380" style="border: 1px solid #ccc; padding: 5px;"> <p> The capacity of the individual is calculated dynamically and will change depending on the applied Team filter.</p> </div>
Edit / Delete entries	Each entry on the list can be edited or deleted.
Add new membership	<p>Use this button to define a new membership and enter the required membership period and the availability.</p> <p>The availability impacts the capacity resulting from the Workload plans and currently there is no validation which means that the total availability may exceed 100%.</p>
Add new member	Add a new team member from the list of Jira users.
