Gantt configuration

MAX NUMBER OF ISSUES*
LOADED:

Maximum number of issues loaded on gantt chart initially. User can load more tasks using 'More' button affecting overall decrease in browser performance.

Task clone link configuration

CLONER LINK

Cloner link

Save

Gantt configuration and limiting the number of tasks

Feature	Description
Maximum number of tasks loaded	<p>By limiting the number of issues loaded at once, the system has less data to work with and can run faster than ever. To load Issues exceeding the limit click the 'Load More' button which appears at the bottom of the screen"</p> <p>Limited to 50 tasks. Load more</p> <p>Each click loads the number of issues specified in this field. For instance, if you define 100 issues as the limit and have 700 of them in total, it will take 6 clicks to load all of them.</p>
Task clone link configuration	<p>When the Program is cloned using the Program Wizard all cloned task will be linked with the source task using the selected link.</p> <p>By default, the Cloners link is selected but you can use any other available link.</p>
