

Gantt - Interface overview - View

Customizing the view

Change the view options to include more information in the Gantt chart or show additional features:

Feature	Description
Column views	Change the Jira fields shown as columns on the tasks list (WBS) and save the column views as presets.
Layout	Change the line spacing between the tasks to fit more tasks on the screen.
Show	Display or hide additional tools: <ul style="list-style-type: none"> Tasks structure - show or hide the Work Break Structure of you tasks. Markers - add and show a deadline (or other important date) marker to the timeline. Critical path - calculate and show the critical path. Baselines - show the tasks' baseline on the chart. Iterations - show the iterations as defined in the Program's Agile Schedule.
Colour by status	Changes the colour of task bars to resemble the status categories.
Detail view	Replace the timeline with the Jira issue detailed view.
Smart labelling	Add the task summary next to the task bar on the timeline if it exceeds the tasks bar's area.
