Task mode [?](#)

Tasks will be automatically rescheduled based on dependencies. Parent tasks will adjust their periods to their child tasks. Selecting this option may cause some unwanted changes like auto-shift of the tasks in the scope.

New tasks default mode

Auto bottom up

Task mode

Use this feature to set the default task mode for tasks which are added to the Program's scope.

It the task was already added to at least single program then its task mode will not be overwritten.
