

# Program Configuration - General - Managing Program's security

This page contains macros or features from a plugin which requires a valid license.

You will need to contact your administrator.

Security ?

Aside from the Global (whole plugin) permissions, you can also limit access to selected Programs only. It's worth noting that BigPicture always treats JIRA permissions as set in stone.

NAME	CODE	DESCRIPTION	ACTIONS
Program admin 2	CNAD	Has access to program configuration	
Users 1			
Angela Hambleton		admin@example.com	Delete
ADD USER			
Groups 1			
jira-administrators			Delete
ADD GROUP			
Program editor 0	CNED	Can edit tasks program	
Program user 0	CNUS	Read only access to program	

## General configuration - Managing Program's security

The Program security settings can be configured only when the 'Default Roles' is selected in the app's global configuration, otherwise, all users will be granted highest level permissions.

There are three levels of permissions on top of the Jira permission and security settings, which are always respected by the app.

The permissions can be granted to individual users or to groups.

	Feature	Description
1	Program admin	All permissions, except for access to <a href="#">Administration</a> are granted to given user or group, including access to the <a href="#">Program configuration</a> .
2	Program editor	Users or groups are allowed to create new Programs and automatically have the access permissions to Programs in which they participate.
3	Program user	Users or groups can open the app and display Programs in a "read-only" mode.

 Program Administrators not necessarily need to be Jira Administrators. Depending on the privileges one holds in the company these may always vary.
